Gurugram, Haryana, India | +91 9153915949 | sakshisrivastava55271@gmail.com | LinkedIn | GitHub

SUMMARY

Software Engineer with hands-on experience building secure, highly available backend services using **Java, Spring Boot, and Microservices**. Proven expertise in **RESTful API design**, J2EE server-side development, and client-side technologies including **React, HTML5, JSON, AJAX, and jQuery**. Strong foundation in object-oriented design, performance optimization, and scalable cloud services within Agile teams.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Backend:** Spring Boot, Microservices, J2EE, RESTful APIs, API Design, Node.js, JDBC
- **Frontend:** React.js, HTML5, CSS3, JavaScript, jQuery, JSON, AJAX, Responsive Web Design
- **Databases & Cloud:** Oracle Database, PostgreSQL, MySQL, MongoDB, AWS, Git, GitHub, Jira, CI/CD, Agile/Scrum
- **Core Competencies:** Object-Oriented Design, DSA, Performance Optimization, SDLC, Code Reviews

PROFESSIONAL EXPERIENCE

Associate Software Engineer

July 2025 – June 2026

Amdocs

Gurugram, India

- Developed and maintained **Java and Spring Boot based backend microservices** for a large-scale enterprise **CRM platform**, implementing business logic and feature enhancements for high-availability applications.
- Designed and enhanced **RESTful APIs** with intuitive contracts and JSON payloads, enabling seamless communication and third-party integration across distributed components.
- Resolved **200+ CRM production tickets** through root-cause analysis and code-level fixes, improving average resolution turnaround by **30%** and reducing recurring incidents.
- Built **15+ automation scripts** for monitoring, data validation, and routine CRM operations, cutting manual effort by **40%** and sustaining **99.9% server uptime** via proactive monitoring and incident response.
- Implemented **secure coding practices** including input validation, authentication/authorization handling, and data integrity checks, safeguarding customer assets in high-availability services.
- Wrote unit and integration tests using **JUnit and Mockito** and supported **CI/CD pipelines**, reducing regression defects and enabling reliable, frequent production releases.

Web Developer Intern

Jul 2024 – Jun 2025

Kaspro Solutions

Mohali, India

- Developed features on a live enterprise application using **Java and J2EE server-side technologies**; implemented frontend enhancements with **HTML5, CSS3, JavaScript, jQuery, and AJAX**.
- Integrated **JDBC adapters with MySQL**, ensuring transactional integrity and secure schema execution; wrote and optimized SQL queries for data retrieval and validation.
- Participated in software design, code reviews, testing, debugging, and defect resolution within an Agile framework.

PROJECTS

AI Incident Management System

GitHub

Python, SQL, REST APIs, OOP

- Engineered Python-based business logic using **OOP principles** to automate incident categorization and workflow processing, mirroring document workflow automation patterns.
- Implemented **REST API integrations**, data validation, and SQL operations with modular, scalable components for extensible workflow orchestration.

Healthcare Management System

GitHub

Java, React.js, HTML5, CSS3, JavaScript, MySQL

- Built a responsive healthcare portal with appointment scheduling and patient management using **Java backend services and React-based UI components**.
- Integrated frontend components with backend REST services and database operations, delivering an efficient, secure, and accessible user experience.

EDUCATION

Galgotias University

Greater Noida, India

B.Tech in Computer Science & Engineering | CGPA: 8.55/10

2021 – 2025

CERTIFICATIONS & ACHIEVEMENTS

- **Java Development Certification** – Udemy | **GenAI Certification** – Amdocs | Solved **500+ DSA problems** on LeetCode and GeeksforGeeks
